Creating the Washington's promise scholarship program.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Creates the Washington's promise scholarship program.

Declares an intent to strengthen the link between postsecondary education and K-12 education by creating the Washington's promise scholarship program for academically successful high school graduates from low and middle-income families.

Finds that, increasingly, an individual's economic viability is contingent on postsecondary educational opportunities, yet the state's full financial obligation is eliminated after the twelfth grade.

Finds that students who work hard in kindergarten through twelfth grade and successfully complete high school with high academic marks may not have the financial ability to attend college because they cannot obtain financial aid or the financial aid is insufficient.

Provides that a city or town may require that the facility: (1) Comply with all building, fire, safety, health code, and business licensing requirements;

Authorizes cities and towns to require a service provider to obtain a master permit. A city or town may request, but not require, that a service provider with an

existing state-wide grant to occupy the right of way obtain a master permit for wireline facilities.

Provides that a city or town shall not adopt or enforce regulations or ordinances specifically relating to use of the right of way by a service provider that: (1) Impose requirements that regulate the services or business operations of the service provider, except where otherwise authorized in state or federal law;

HB 2929-S by House Committee on Agriculture & Ecology (originally sponsored by Representatives McDonald and Linville)

Modifying requirements concerning on-site sewage disposal systems.

(DIGEST OF PROPOSED 1ST SUBSTITUTE)

Recognizes that a major source of nonpoint pollution is failing on-site sewage disposal systems. The 1999-2001 Puget Sound water quality work plan, developed by the Puget Sound water quality action team, indicates that local governments have reported failure rates for on-site sewage disposal systems of up to twenty-five percent along the shoreline of Puget Sound.

Finds that the public health and water quality can be better protected by: (1) The development of better data;

(2) the development of clear lines of responsibility between the designer, installers, and homeowners; and

Declares that a water right for instream use may also be established through the approval of a change, transfer, or amendment of an existing water right under chapter 90.03 RCW or chapter 90.44 RCW in the manner prescribed for a water right for any other use. A water right for an instream use established through such a change, transfer, or amendment may be held as an appropriative right by any person or entity.

Finds that it is in the state's interest to undertake a program of bay-wide planning where appropriate to provide opportunities for examining the feasibility of sediment removal or consolidating most or all of the contaminated sediments in an urban embayment in limited appropriate locations within that embayment or within other more environmentally appropriate locations in Puget Sound.

Finds also that bay-wide planning should address needs for salmon recovery, public access to state-owned aquatic lands, and economic development.

Finds that public safety and the environment may best be protected by adopting standards that are equal to, or more stringent than, those adopted by the federal government, so long as they do not impermissibly interfere with interstate commerce.

Requires that the department shall, by June 30, 2002, develop and periodically update, for the consideration by local governments: (1) A model ordinance that establishes setback and depth requirements for new pipeline construction;

(2) a model franchise agreement for jurisdictions through which a hazardous liquid or gas pipeline is located; and
